

Go Integrator Release Notes: 3.2.1.18574

Go Integrator Version 3.2.1.18574

New Features

Windows 11 is now a fully supported Operating System

Bug Fixes

Resolved "focus stealing" by Send Digits textbox

Resolved "focus stealing" during consult from preview window

Exiting client dealuminate BlynLight/Busylight

Fixed issue with call settings flipping to incorrect page, it is meant to flip on save to each one you have changed - so it can show errors if need be but it was going to the wrong pages in some scenarios.

ACD Unavailability working if a user is enterprise

Fixed: Listener Ports Remain Open After Being Disabled in Client

Changed label and link for Edge addon

Resolved Call event not creating Phone activity correctly

Improved logging of ACD monitoring in logs

Improvements

Clean SSL and API certificate on uninstall

Include New accepted CA identification names

Improvements/Bug Fixes

Hubspot: Endpoint updated

Exact Synergy Enterprise: Fix for SQL Client connection

Orthomatic: Fixed issue with phone numbers stored as just trunk-number (i.e. 0614555887)

MS Dynamics 365: Update addin to work with 'Government'

Exact Online - Adjusted timings for refreshing tokens using API

Fix Act! addin for environments where custom field mapping is not being used

Support for Act! v24 (64-bit)

ODBC: Improve data preview in Configuration

in2crm: Caching option removed

Carerix: Support searching for internationally formatted national numbers

iConnect - For caching purposes, integration now only requests authorisation token at the beginning, and then only if the token fails will it re-request it

crmSeries: Improved error messages

Outlook: Update to Redemption v6.1 to support Microsoft Store edition of Outlook
