Version 4.3.1.6565

## Release Notes

### Bug Fixes

Removed Log which showed sensitive information

resolved issue with cache check box

Email displayed no longer wraps text

Events are now directed to the same route as call activities

Custom events - The number of user objects is now significantly lower

Editable Shared "Contact directory" source is imported from V3 settings

To force the form show we used TopMost=true -> TopMost=false technique which always sets it to false
