

## Quick Starter Guide

Tray Menu mode (Windows client)

## Quick starter guide: HiHi Vision v4

## Introduction

This quick starter guide contains useful information to help get started with HiHi Vision v4 Windows client.

## Licensing

HiHi Vision must be licensed before it can be used. User licenses are either assigned in advance by your provider, or registered by the user at first login using a provider supplied License Key code.

## Shortcut

After installation HiHi Vision v4 is available from the start menu shortcut:

## User Login

HiHi Vision requires User credentials to connect to the telephony platform. User credentials can be confirmed each time the client is started or can Auto login to bypass this step.

## Interfaces

HiHi Vision has four main user interfaces: Tray Menu, AppBar, Call Toolbar and Preview Window. The Tray Menu and AppBar provide similar functions - choose your preferred mode through "interface" settings. Tray Menu mode is the default setting. The Call Toolbar and Preview Window operate the same way in either mode. This guide explains the Tray Menu - for AppBar, please refer to the separate AppBar guide.

## Tray Menu

In Tray Menu mode, the menu is accessed by a right-click on the HiHi Vision system tray circle icon, usually green for "Available" status. The icon changes according to your extension state or Microsoft Teams Availability, if enabled.

The following functions are launched from the Tray menu: Presence, Address book, Call History, Call Settings, Call Toolbar, Search/Dial, Recent Calls, Make Call, Call Center (if enabled) Configuration, Help and Exit.

## Quick Dial / Search

One of the most powerful features is the combined Search and Dial entry field at the bottom of the Tray Menu following a right-click of the system tray icon. To make a call, simply type the number to dial and hit Enter.

Alternatively, type a contact name (either full or partial) to initiate a search of any system directories or integrated CRM business applications.
The search results are displayed directly within the Tray menu window simply click the number to dial, or open the contact using the slide out menu.

Extension status / MS Teams Availability is also displayed for co-workers. For additional dialing methods, refer to the Dialing Options section below.

## Call Toolbar

The Call Toolbar can be docked to either the top or bottom of the screen and provides many core features including caller display, call handling buttons and, if enabled, Call Center Agent features.

## Preview Window

The Preview Window is displayed whenever an inbound or outbound call is active and automatically hides after the call has connected (the hide delay time of the Preview Window can be altered in Configuration). It can be re-displayed at any time during the call by hovering over the HiHi Vision system tray icon.

Context-sensitive call handling buttons are presented along the bottom of the Preview Window. Display information includes caller/called party details, which are retrieved from the system directory or any integrated CRM business applications.

## Quick starter guide: HiHi Vision v4

## Call Controls

The following call controls are available through the Preview Window and Call Toolbar:

| (2) | Answer | When a call is ringing, you can choose to answer the call by clicking the "Answer" button |
| :---: | :---: | :---: |
| (16) | Deflect | or deflecting it (transfer it without answering it) to another extension |
| (3) | Hang Up | End the current call |
| (II) | Hold | Pause the call - the caller will hear hold music if available |
| (11) | Conference | Call another party to join into a conference call with a current connected party |
| (6) | Consult | Place the current call on hold and transfer the call to another extension |
| (6) | Transfer | Blind transfer to another extension without introduction |
| (4) | Send Callback Email | Open email client to send email with connected call details included automatically |
| (2) | Show Contact | Shows the full contact details, obtained from the telephone system directory |
| (2) | Add Contact | Add the caller to the shared address book or integrated CRM business application/s |
| (曷 $¢$ | Open/Pop Contact | Open the full contact details within an integrated CRM business application. The icon shown will relate to the CRM application (e.g. Outlook, Salesforce). |
| 0 | Create and Show Call Task | Creates and opens a call activity (call log) in an integrated CRM business application. The icon shown will relate to the CRM application (e.g. Salesforce) |

The Call Control functionality is dependent on the preferred device selection. The call controls displayed in the Preview Window will be driven by the Preferred device selected - see table in "Make Calls" section below.

## Preview Window Stacking

If there is more than one active call, the Preview Windows for those calls are automatically stacked to reduce the overall size of the display. Clicking on the header of any window will bring it to the front.

## Presence

The Presence window displays co-worker's live extension status which is blended with Microsoft Teams Availability, if enabled.

Key features available from Presence include:

- Call co-workers or transfer call
- Show co-worker details
- Open Microsoft Teams chat
- Send Callback Email
- Add to Favorites

Depending on the size of your organization, the Presence window will automatically populate with co-workers, sorted by department.
The contact list can be arranged by group or location if preferred, or as a single list of contacts arranged by name or number as required.

A personalized Favorites group can be created by searching for a coworker and selecting the star symbol in the slide out menu that appears when hovering over the contact.

Calls can be initiated or quickly transferred to co-workers with the slide out menu when hovering on a contact.

## Quick starter guide: HiHi Vision v4

## Address Book Search

HiHi Vision V4 can search Microsoft Outlook, Google Contacts and the telephone system shared or personal directories, plus any integrated CRM business applications, depending on the user license level.

To dial the required contact, simply click on the telephone number displayed to initiate the call, or use the Call button from the slide out menu.

During a connected call, the slide out menu will also offer call transfer options so calls can also be quickly transferred to contacts found through the address book.

Alternatively, the contact details can be opened via the slide out menu when hovering over the contact name. Just click the CRM icon to open the contact within the integrated application (example shown for Salesforce).

For any compatible CRM configured, the New Contact selection will also allow creation of new contacts directly into the CRM address book.

## Call History

| 암 Call history | $-\quad \square \times$ |
| :---: | :---: |
| - Today | $\wedge$ |
| (u) (U) $\begin{gathered}\text { (Unknown) } \\ 9289639\end{gathered}$ | 2:22:42 PM |
| $\approx \text { Is } \begin{aligned} & \text { John Smith } \\ & 571-441-5959 \end{aligned}$ | (6) (1) |
| - Wednesday, October 14, 2020 |  |
| $\text { c. C. } \begin{aligned} & \text { (California) } \\ & (661) 60777 \end{aligned}$ | 1:30:17 PM |
| - Thursday, September 24, 2020 |  |
| $\approx \quad \text { P } \quad \begin{aligned} & \text { (Pennsylvania) } \\ & \text { (267) } 60975 \end{aligned}$ | 1:30:45 PM |
| 4 Tuesday, September 22, 2020 |  |
| $\approx \text { (C) } \begin{aligned} & \text { (California) } \\ & \text { (213) } 60041 \end{aligned}$ | 1:49:06 PM |
| 」 Friday, September 18, 2020 |  |
| $\approx \text { C } \quad \begin{aligned} & \text { (California) } \\ & \text { (213) } 60041 \end{aligned}$ | 6:04:23 PM |

The Call History window displays a
 detailed call history including recent inbound, outbound and importantly, missed calls, ensuring a clear notification to avoid missing opportunities. Simply click the telephone number displayed to initiate the call.

For known contacts, the contact details can be opened via the slide out menu when hovering over the contact name. Just click the icon to open the contact page within the integrated CRM business application (example shown for Microsoft Outlook).

## Quick starter guide: HiHi Vision v4

## Additional Features

## Missed Call Notification

A pop-up window can appear following a missed incoming call, providing a quick call-back method to avoid missing opportunities.
The notification will stay visible until an action is taken.

## Add Contact

When a telephone number is presented in the Preview Window, Call History or Recent Calls list and a contact cannot be found, the Add Contact icon is presented: (2)
Click the icon to add contact information and then save to the desired directory or integrated CRM business application. The Add Contact
 feature can also be used to copy the contact to other locations.

## Recent Calls

The "Recent Calls" list displays a summary of the most recent calls, showing just a single entry for each contact or number listed.

Simply click the number to make the call, or open the contact using the slide out menu.

## Make Call B

To make a call using the built in Dialpad, click the Make Call icon and click to enter the required telephone number.

Where multiple devices are available, the drop down list allows you to choose your Preferred Device for call handling. This will also define which call control buttons are offered based on the compatibility of the selected device.

Note: the ability to answer a call through HiHi Vision is dependent on the device type selected - for example MS Teams calls cannot be answered by
 HiHi Vision.

Preferred Device Call Control:

|  | Answer | Deflect | Hold | Conference | Consult <br> transfer | Blind <br> transfer | Hang <br> up |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Primary Device* | $\checkmark$ | $\checkmark$ | $\checkmark$ | $\checkmark$ | $\checkmark$ | $\checkmark$ | $\checkmark$ |
| Secondary Device* $^{*}$ | $\times$ | $x$ | $\checkmark$ | $\checkmark$ | $\checkmark$ | $\checkmark$ | $\checkmark$ |
| Teams | $\times$ | $x$ | $x$ | $x$ | $x$ | $\checkmark$ | $\checkmark$ |

*also depends on telephone platform configuration

## Quick starter guide: HiHi Vision v4

## Dialing Options

HiHi Vision offers a wide range of Click-to-Dial features to accelerate the outbound calling process, both in locating the number to dial and in the actual dialing process itself. The most common dialing tools are described here:

## Clipboard Dialing

Any telephone number copied into the Windows clipboard can be dialed via an automatic pop window, offering the option to dial the number. Just click the Call icon to dial.

| Bemposing | $\times$ |
| :--- | :--- |
| Number to dial: |  |
| 0797445811 |  |
| (C) |  |

## Web Page Dialing

HiHi Vision can recognize telephone numbers in web pages and convert them to a quick dial hyperlink. Simply click-to-dial directly from the web page.

## Screen Read Dialing

With "Screen Read" dialing, you can click-to-dial any number on screen, even when presented as an image. Just hover the cursor over the number displayed and hold 'ctrl' and 'shift' simultaneously to turn the number into a quick dial link:

## Focus Dialing

With Focus dialing enabled, HiHi Vision can automatically detect telephone number fields within other windows applications to present a click-to-dial icon to the right of the field. If the field contains more than one telephone number, a drop-down is displayed when you hover over the icon, allowing you to select which number to dial.
