

What's new in Go Integrator Nava?

Product Update: v4.5.0

Go Integrator Nava is a unified communications client for the NetSapiens hosted telephony platform. In this latest version, 4.5.0, new features have been added, along with various improvements, bug fixes and an updated CRM Integration library with 14 new CRM Integrations.

New Features

Related Data

Go Integrator Nava extends its CRM integration feature set with Related Data, providing the user the ability to quickly locate and present additional data related to the caller*.

This enhancement to CRM integration improves customer experience by providing impactful data from one or more integrated CRMs, arming the user with key information they need at the time of the call.

The screenshot displays the 'Contact: Glen Wilson Acme Limited' profile. On the left, contact details are listed: Business Phone (07751211889), Business Fax (01733667801), Home Phone (+447751211889), Email (nh@gmail.com), Contact ID (0036M00005BTnKKQA1), Town (Peterborough), Country (UK), Postal code (PE2 6LR), Street (Arena House 5 Commerce Rd), and Contact Description (Refer to Ian Deacon). On the right, the 'Activity' tab is selected, showing a list of events:

- 28 June 2024**
 - Meeting for Related data (10:00:00)
- Today**
 - Subject - Integration with CRM (16:31:50)

 - Incoming call: (07751) 211 889 [Glen Wilson] -> 2265 [Nick Hawes] (Direction: Incoming)
- 20 June 2024**
 - Incoming call: (07751) 211 889 [Glen Wilson] -> 2265 [Nick Hawes] (Direction: Incoming)
- 07 June 2024**
 - Case number 701 - Agent needs extension update (11:56:34)
- 16 May 2024**
 - Meeting to discuss Integration (17:30:00)
- 15 May 2024**
 - Event : Major release of software v4.5 (15:00:00)

Examples of related data include the **callers tickets, cases, call activity records, and emails**. The related data is presented to the user within an expanded window, accessible from a number of locations including the Preview Window, Call Toolbar, AppBar, and Tray Menu search.

Users can simply access this data within the tabs:

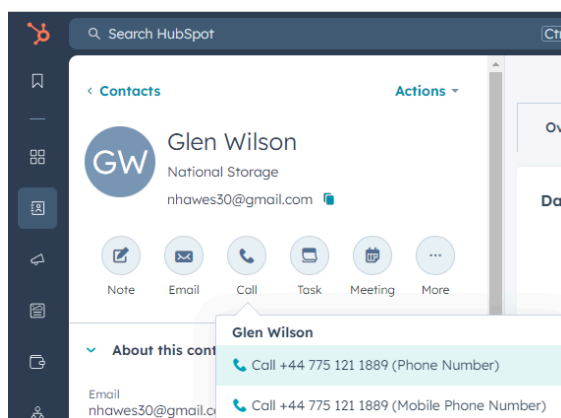

- **Activity** - A timeline of Activities (time related data) - e.g. Call activity records, emails, calendar meetings
- **Related Data** - Related data to the caller, e.g. the company they work for, open deals they have, and open tickets.
- **Other CRM** - When multiple CRM's are used this displays additional CRM's where the contact appears, with the ability to screen pop.

When multiple CRMs are configured, Related Data combines search results into one window to deliver an extended set of shared information tied to the contact.

**Related Data is currently available for a number of CRM Integrations: Freshdesk, HubSpot, Keap, Microsoft Dynamics 365, Microsoft Outlook (desktop) and Salesforce.*

Native Dialling within HubSpot

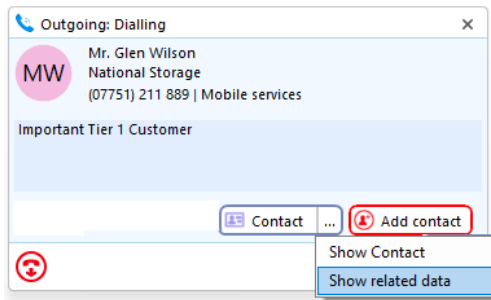

Go Integrator Nava has been added to the HubSpot App Marketplace to integrate directly with the HubSpot Calling Extensions SDK. This directly integrates to the HubSpot calling options, to make calls directly from HubSpot.

Improvements

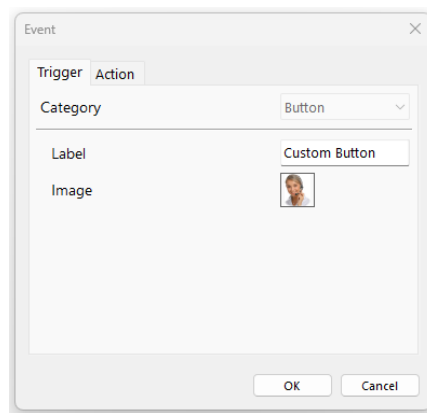

Combined Context Buttons

User display enhancements have been made to combine "Show Contact" and "Action buttons" from a number of locations within Go Integrator Nava that include Preview Window, Call History, and the new Related Data window. Combined context buttons now present multiple actions that come from a single CRM into a combined button, making it clearer and easier to navigate for users whilst keeping Screen Pop as the default action.

Custom Icon for Custom Event Button

When using the button to trigger a custom event, the icon can now be changed to use as custom .PNG or .ICO image.

New Integrations

The following CRM Integrations have been added, or improved, in this version:

	<p>Aerona Dental is a cloud-based practice management software. AeronaDental Clinical & Dental Software is an integrated system for appointment management & more.</p>
