

Partner CRM

Release Notes

Version: 5.1.0.2664 Partner CRM

Release Date: 2021-12-14

Improvement

Obfuscated branding file

Encrypted the Crm Addin configuration storage

Support added for multiple public keys to allow support for Staging and production environments

Ignoring well known prefixes (dyn-, pre-, rc-) when choosing what directory to store configuration within

Supports email address as a special type when searching using the API

Bug Fixes

Hubspot search now returns results

Fixed: Valid Solo license JWT does not launch Partner CRM

CRM configuration now obfuscated

Change new websocket address to support tokens in the URL.
